CHOPPADANDI SAGAR

Senior Software Engineer

@ sagarchoppadandi@hotmail.com   6305750501   Hyderabad

SUMMARY

I am an experienced software engineer with over 9 years in software development, particularly in creating web-based applications using modern frameworks like LARAVEL and Django. I have a solid background in integrating various systems, enhancing user experience, and improving operational efficiency through robust software solutions. My goal is to leverage my expertise in a challenging role to continuously upgrade my skills and contribute to impactful projects

EXPERIENCE

Senior Software Engineer

USM Business Systems

📅 08/2016 - Present   📍 Hyderabad

A software development and IT company specializing in creating web-based and client/server applications

- Handle the organization and delegation of tasks
- Planning, monitoring, and documenting tasks throughout a project

EDUCATION

Post Graduate in MCA

MATHRUSRI Institute of PG Studies (Osmania)

📅 06/2010 - 06/2013   📍 Hyderabad

Graduate in B.SC(MCCS)

Chaitanya Degree College (KAKATIYA University)

📅 06/2007 - 06/2010   📍 Hyderabad

Intermediate

Chaitanya Junior College

📅 06/2005 - 06/2007   📍 Mancherial

SSC

Sri Saraswathi Shishu Mandir

📅 06/2005 - 06/2005   📍 Mancherial

KEY ACHIEVEMENTS

🏆 **Integration of PHONEPE Payment Gateway**

Successfully integrated PHONEPE payment gateway with LARAVEL APIs, contributing to secure transaction processing and enhancing user experience across web and mobile applications

⚡ **Migration of ATS from LARAVEL to PYTHON**

Migrated the Applicant Tracking System (ATS) from LARAVEL to PYTHON, improving performance and scalability across the recruitment process

SKILLS

PHP   PYTHON   LARAVEL   Django   MySQL   MVC   OOP   REST API   Ajax   Fast API   Git   HTML

JavaScript   jQuery   JSON   AWS   GITLab   XAMPP   Tortoise SVN

PROJECTS

Pet-First

📅 01/2023 - 01/2024   📍 USM

Pet-First is a comprehensive pet care application that provides grooming services and manages pet-related activities
- Designed and implemented a scalable database schema for handling bookings
- Developed secure and optimized backend APIs for mobile app integration
- Built an admin panel to monitor and manage customer bookings
- Implemented features to view customer booking history and transaction logs
- Conducted code reviews and database query optimizations

AMOEBA (ATS- Application Tracking System)

📅 07/2021 - 01/2023   📍 USM

Migrated ATS enhances recruitment processes by managing job openings and candidate tracking
- Designed and developed a robust ATS using Python
- Migrated core functionalities from Laravel to Python for improved performance
- Built RESTful APIs in Python for third-party integrations

CHARMS

📅 06/2021 - 12/2022   📍 USM

CHARMS manages voters and office bearers' information for teleconferences, surveys, and campaigns
- Designed and developed a comprehensive Dashboard and Admin Panel
- Created robust and secure APIs for mobile app functionality
- Developed dynamic Reports APIs to provide campaign insights

AMOEBA (ATS- Application Tracking System)

📅 07/2019 - 07/2021   📍 USM

The ATS software helps organize job openings and track candidates efficiently
- Designed and developed a robust ATS to streamline recruitment processes
- Integrated AI-driven virtual interview features
- Built RESTful APIs for third-party service integration

Customer Relationship Management (CRM)

📅 08/2018 - 04/2019   📍 USM

The CRM system streamlines customer relationship management processes for businesses
- Collaborated with senior developers to understand project requirements
- Assisted in creating and optimizing APIs
- Developed graphs and charts for various reports

HRMS (Human Resource Management Systems)

📅 11/2016 - 07/2018   📍 USM

HRMS serves as a comprehensive solution for managing HR operations efficiently
- Led the end-to-end development of the Employee Creation Module
- Designed and developed APIs for mobile integration
- Delivered dynamic dashboard reports for HR operations
